Alliander N.V.

Update following publication of 2022 results

Summary

Alliander N.V.'s (Alliander, Aa3 stable) credit quality is underpinned by the company's low business risk as the monopoly provider of electricity and gas distribution network services within its service area; stable and predictable cash flow, generated under a well-established and transparent regulatory framework; and strong financial profile, with modest leverage (as measured by net debt/fixed assets) compared with other European networks (Exhibit 1).

Over the current regulatory period 2022-26, we expect a decline in the still-strong financial metrics because of falling regulatory allowed returns and growing capital spending, primarily related to facilitating the delivery of the [Netherlands'](#) (Aaa stable) ambitious energy transition objectives.

Exhibit 1  
Modest leverage, compared with other European networks, supports its strong standalone credit quality

Metrics are as of December 2022, except National Grid plc (NGET) (as of March 2022) and Fluvis, Terna and Snam (as of December 2021). Ratings reflect the standalone credit quality, expressed as the assigned final rating or Baseline Credit Assessment, where applicable.

Source: Moody's Investors Service

Alliander's Aa3 rating incorporates a two-notch uplift from its standalone credit quality, defined as the Baseline Credit Assessment (BCA) of a2, reflecting the strong probability of extraordinary financial support from its owners, the largest of which is the province of Gelderland with a 45% shareholding, if needed.

## Credit strengths

- » Low business risk of monopoly distribution network activities, with limited contribution from unregulated businesses
- » Stable and transparent regulatory regime
- » Modest leverage (as measured by net debt/fixed assets) compared with the wider peer group
- » Expectation of strong support from local government shareholders and the Dutch state, given the essentiality of assets and the key role the company will play in facilitating the energy transition in its service area

## Credit challenges

- » Decline in allowed returns reduces financial flexibility
- » Increased capital spending requirements to support the country's energy transition will increase leverage
- » Stranded asset risk faced by gas networks in the context of the energy transition
- » No final decision yet on the handling of higher grid losses beyond 2023 until the end of the current regulatory period ending in December 2026

## Rating outlook

The stable rating outlook reflects our expectation that Alliander will continue to derive most of its revenue and cash flow from low-risk regulated activities and maintain a financial profile in line with our minimum guidance for the current rating as outlined below ("Factors that could lead to a downgrade").

### Factors that could lead to an upgrade

A rating upgrade is currently unlikely, taking into account the expected weakening in Alliander's financial profile as a result of decreasing allowed returns and the growing investment requirements in the context of the country's ambitious energy transition objectives.

### Factors that could lead to a downgrade

A rating downgrade could be triggered if Alliander fails to maintain minimum credit metrics for its rating, with a deterioration in its financial metrics, such as funds from operations (FFO)/net debt persistently below 16% and net debt/fixed assets significantly above 50%.

The Aa3 rating could also be subject to downward pressure if the credit quality of the municipalities and provinces owning Alliander were to significantly weaken or if our assessment of extraordinary support weakened.

## Key indicators

Exhibit 2

### Alliander's strong metrics are likely to deteriorate with growing investment needs amid falling returns

## Profile

Alliander N.V. (Alliander) owns and manages low and medium voltage electricity and gas distribution networks in the Dutch provinces of Gelderland, Noord-Holland, Flevoland and large parts of, Friesland and Zuid-Holland. The company is the largest electricity and gas network operator in the Netherlands with around 3.3 million electricity and 2.5 million gas connections, covering around 35% of the Netherlands. The vast majority of Alliander's revenue comes from its regulated activities (Liander network activities).

The company is fully owned by Dutch provinces and municipalities, with the largest stakes held by the provinces of Gelderland (44.68%), Friesland (12.65%) and Noord-Holland (9.16%), and the City of Amsterdam (9.16%). The remaining 24% share is owned by 70 small municipalities where Alliander provides its network services.

## Detailed credit considerations

### Low business risk, underpinned by regulated cash flow

Alliander's core business activities relate to low-risk monopoly network operations. These activities contribute around 90% of consolidated revenue and nearly all of its operating profit, underpinning its relatively stable revenue and providing stable and predictable cash flows under a well-established and transparent regulatory framework.

Alliander's remaining revenue largely relates to services offered to customers with regulated network activities, such as network service, maintenance and operations for regulated monopolies, carried out through Alliander's subsidiary Qirion. Although these business activities are non-regulated, they are strongly linked to Alliander's core business.

The country is also contemplating developing its district heating infrastructure. Although the activity does not benefit from a similar regulatory framework as electric or gas networks, some Dutch network operators, such as Alliander, can decide to have a role in its operation. However, it is still unclear how funding needs will be covered and a regulatory framework will be structured. The proportion of non-regulated cash flow could increase in the 2020s if heating operations are deemed to be non-regulated (new heating systems will be needed for 1.5 million houses in the Netherlands by 2030 under the Climate Agreement, discussed below "National energy transition plan increases need for investment"). Otherwise there are efforts to focus on core operations, which are also reflected in the intended sale of the Kenter subsidiary. Kenter is focused on integrated energy services. The sale is currently being discussed and targeted to be completed within 2023.

### Established regulatory framework, but returns continue to decline in real terms; however, gas networks will collect higher cash flow over 2022-26

The Dutch regulatory framework, applied since 2000 and 2001 for electricity and gas networks, respectively, allows the country's distribution network companies to earn a return on their regulated asset base and provides allowances for costs adjusted for consumer

price index inflation and an efficiency incentive factor. The regulation incorporates incentives determined using a yardstick mechanism, which defines the cost efficiency and quality factors based on industry averages and encourages network companies to outperform the sector in terms of profitability. This approach is typical among regulatory regimes in Europe, and the application by the Dutch regulator, the Authority for Consumers and Markets (ACM), has been transparent and consistent to date.

In September 2021, the ACM published its final Method Decisions for electricity and gas distribution network operators in the Netherlands for the 2022-26 regulatory period. Allowed returns fell by around 180 basis points in real terms (pre-tax) between 2021 (3.0%) and 2022 (1.15% for distribution network operators), mainly reflecting the low interest rate environment.

However, gas network operators will receive advanced cash flow because the regulator switched from real to nominal returns, with nominal returns in 2023 likely to be around 2.9%. The depreciation of the gas network assets was accelerated (by a factor of 1.2x for the distribution companies, compared with 1.3x for the gas transmission network) because of the uncertainty around the remaining useful life of the gas network assets. The regulator also allowed the recovery of network decommissioning costs via subsequent calculation and with a recovery after two years.

For electricity distribution network operators, 50% of the forecast inflation will be added to the real return, while the regulated asset base will inflate with the remaining 50%. In addition, the ACM made changes to pre-calculate [TenneT Holding B.V.](#)'s (A3 stable) transmission costs on a yearly basis to avoid large recalculations as was the case in 2020, smoothing fluctuations in tariffs and ultimately Alliander's cost profile. Furthermore, the ACM amended the regulatory framework to account for strongly rising interest rates and inflation (annually updated for actual figures versus the assumed risk-free rate and interest utility index, reflected in the tariff t+2), and the higher cost of grid losses; the latter are driven by increased power prices to compensate at least for higher-than-allowed costs in 2023.

Exhibit 5

#### Allowed returns for Dutch network operators show a declining trend

(1) The weighted average cost of capital (WACC) for 2021 corresponds to the original Method Decisions published in 2016, following the CBb ruling of December 2019. (2) Between 2017 and 2020, it would reflect straight-line extrapolation between the 2016 WACC (amended Method Decisions) and the 2021 WACC (original Method Decisions). (3) 2022-26 reflects the Final Method Decisions from September 2021.

Sources: ACM and Moody's Investors Service

Initially, we assumed that the methodology changes will generate additional EBITDA of €120 million-€130 million or FFO of €90 million-€100 million for Alliander over 2022-26, which would have led to an improvement in FFO/net debt by around 2.5 percentage

points. However, the allowed equity return for Dutch network operators is also among the lowest across the European frameworks, mainly linked to a shorter-term focus on determining the risk-free rate<sup>1</sup>.

However, strong increases in inflation and interest rates, and especially massive increases in power prices compared with the numbers expected when the regulatory framework was determined in 2021 weigh on Alliander's profitability. These changes are addressed in the regulatory parameters by the ACM, as outlined above ("Established regulatory framework"). The mitigating factors such as higher tariffs to reflect increasing costs for grid losses and higher transmission costs, however, are only implemented for 2023 as of now. A continuation in 2024 and onwards is likely if energy prices stay high, because otherwise the allowed income would not be sufficient to capture actual costs, a credit negative.

In December 2021, Alliander and its Dutch network peers jointly appealed the ACM's determination to the Trade and Industry Appeals Tribunal (CBB), stating that the Method Decision "takes insufficient account of the energy transition", and "nor is compensation given for new, possibly very high, costs of congestion management." A court ruling on the appeal is expected during the first half of 2023.

### National energy transition plan increases need for investment

The Netherlands has committed to ambitious climate change targets, but progress has been slow to date. The country's total emissions make up 5.2% of the EU total and have decreased by 13.4% since 2005, below the EU-wide emission reduction of 19% during the same period. Its carbon intensity also decreased at a lower rate than the EU-wide average, with a 29% reduction in 2005-19 for the Dutch economy. The share of renewable energy sources reached 8.8% in 2019, with a 27% target for 2030<sup>2</sup>.

In June 2019, the Dutch government adopted the Dutch Climate Agreement that commits the Netherlands to a 49% reduction in CO<sub>2</sub> emissions (relative to 1990 levels) and the generation of 70% of electricity by renewable energy sources by 2030; and a 95% reduction in CO<sub>2</sub> emissions (relative to 1990 levels) and the carbon-neutral generation of all electricity by 2050.

Compared with the progress to date, delivering these targets will require a significant acceleration of the energy transition across many areas, which would result in significantly increased capital spending for Alliander in the 2020s, including new connections for local renewable generation (primarily solar and onshore wind), reinforcing the grid to cope with the growth in electric vehicles and heat transition. Alliander has reported that the main challenge is to keep up with the pace of the energy transition. There is already a significant shortage of qualified engineers in the sector, and the shortage of grid capacity has led to some delay in connecting renewables to the grid.

Consequently, we expect the energy transition to result in further significant increases in Alliander's capital investment, which has grown appreciably since 2015, from around €570 million per annum (gross of customer contributions) to around €1.2 billion in 2022. This includes the smart metre roll-out in 2015-20 and increased demand for new connections of decentralised generation to the electricity grid.

Because of the expected increase in capital spending as part of the ongoing energy transition, Alliander has raised funds from its shareholders through a €600 million reverse convertible hybrid shareholder loan, closed in December 2021. In addition, the proceeds from the Kenter sale will be used to fund the increasing capital needs.

Exhibit 6

**Alliander's gross capital spending will continue to increase to support the country's energy transition**

Source: Alliander and Moody's Investors Service

As illustrated by the cancellation of the requirement to provide compulsory gas connections to new residential areas, the Netherlands is moving away from natural gas towards more sustainable sources of energy, which raises the risk of stranded assets for gas networks. Reflecting this risk, the ACM included several methodology changes on allowed revenue, as discussed above ("Established regulatory framework"). In parallel, the ACM is conducting analyses on the alternative uses of the gas network, such as green gas and hydrogen.

Investments in district heating infrastructure could further increase capital spending; however, this is still a discussion point and hence is not factored into our forecasts.

### Modest leverage compared with peers supports strong standalone credit quality, but increasing pressure from lower returns and higher investment

Like its closest peer [Enexis Holding N.V.](#) (Enexis, Aa3 stable), Alliander has a strong financial profile with modest financial leverage compared with the wider European peer group of energy network companies (see Exhibit 1). Over the coming years, we expect Alliander's financial profile to weaken because of the reduction in allowed returns (reflecting the low interest rate environment at the time of the framework determination) and increasing investment requirements to support the delivery of the country's energy transition.

Financial metrics in 2020 were hurt by the €63 million one-off increase in transmission grid costs from TenneT TSO B.V. (TenneT, the national electricity transmission system operator owned by TenneT Holding B.V.). However, these costs were recovered by Alliander with a two-year lag in 2022, leading to strong FFO/net debt in 2022.

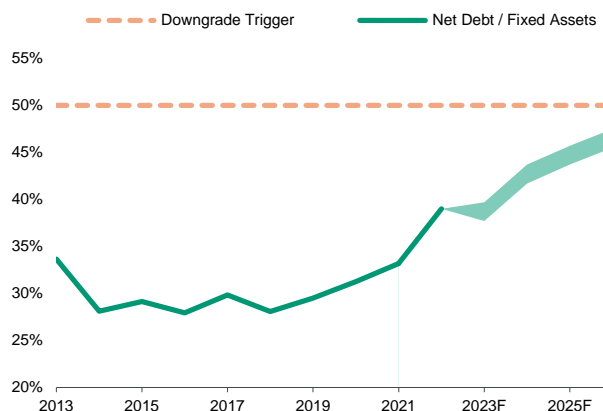

Under our base case, Alliander's FFO/net debt could decline towards the midteens in percentage terms, the minimum required for the current rating, in the later years of the current regulatory period. Higher-than-forecast investment requirements or a lack of reimbursement of costs above the allowed revenue cap could increase the pressure unless offset by either the ACM's interventions or other balance-sheet strengthening measures, which could include additional equity. The intended sale of Kenter is already included in our projections. Leverage, calculated as net debt/fixed assets (as a proxy for the regulated asset base), is likely to remain modest compared with that of most European peers and well below 50% during the current regulatory period. This will be supported by the company's dividend policy, with a payout ratio of 45%, while keeping the solvency ratio at least at 30%. In addition, the Kenter sale will strengthen the company's balance sheet and credit metrics. To mitigate the effects of a further worsening of the capital structure, the Dutch government, together with the three distribution system operators (DSO) Alliander, Enexis and Stedin, agreed on a legal framework that gives them access to additional government funding in the form of equity injections. Currently and based on our projections, it is unlikely that Alliander will make use of this equity injection option during the current regulatory period.

Exhibit 7  
**We expect cash-flow-based metrics to weaken because of lower allowed returns and higher capital spending...**  
**FFO/net debt against the ratio guidance for the a2 BCA**

Exhibit 8  
**... but Alliander will maintain modest gearing**  
**Net debt/fixed assets against the ratio guidance for the a2 BCA**

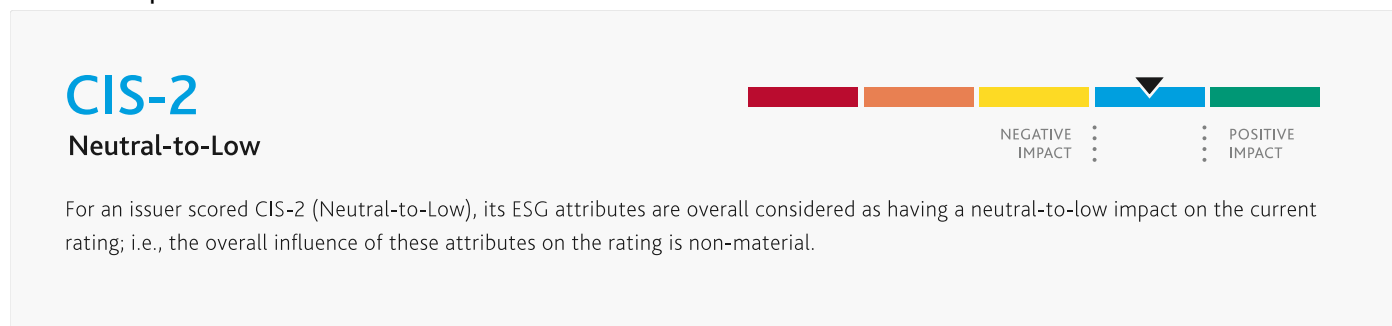

Moody's forecasts represent our opinion and not the view of the issuer.  
 Source: Moody's Investors Service

On 31 May 2021, Alliander amended its financial policy through the loosening of some of its minimum financial targets. In particular, the company's minimum requirement for FFO/net debt (as defined by the company) was changed to 15% from 20% and the company's minimum credit rating level to be maintained was changed to a solid A final rating from a solid A rating on a standalone basis (i.e., the latter does not take into account the benefit of implied support from its owners). The change in financial policy reflects that the company will be less likely to put in place measures to counteract the effect of the decrease in allowed returns and increasing capital spending on financial metrics. Nevertheless, the overall financial profile will continue to be supported by a prudent dividend policy, with a payout ratio of around 45%.

## ESG considerations

### Alliander N.V.'s ESG Credit Impact Score is Neutral-to-Low CIS-2

Exhibit 9  
**ESG Credit Impact Score**

Source: Moody's Investors Service

Alliander's ESG Credit Impact score is neutral-to-low (**CIS-2**), indicating that its ESG attributes have a neutral-to-low impact on the current rating. Alliander's **CIS-2** reflects moderately negative exposure to environmental and social risks, mitigated by the positive influence of governance considerations, and our expectation that its shareholders would provide support to the company, if this were to become necessary.

Exhibit 10

## ESG Issuer Profile Scores

Source: Moody's Investors Service

### Environmental

Alliander's environmental risk is moderately negative (**E-3** issuer profile score) as its electric and gas network assets have a moderately negative exposure to physical climate risk due to rising sea levels and, with regard to gas, carbon transition risk. Alliander generates c. 90% of its revenues from its regulated electric and gas distribution network activities with a substantial, although decreasing, share from gas (around one third of the company's regulated asset base). This is balanced by neutral-to-low risk exposure from water management, waste and pollution of air and soil, and natural capital.

### Social

We assess Alliander's social risk as moderately negative (**S-3** issuer profile score), reflecting the exposure of its regulated activities in the Netherlands to the risk that public concern over environmental, social or affordability issues could lead to adverse regulatory or political intervention, similar to other regulated electric and gas networks operators. Alliander also has moderately negative exposure to public safety risk, as a gas leak or explosion, although unlikely, could have a significant negative impact on the company's reputation and financial situation. Alliander has moderately negative exposure to human capital risk as it has reported difficulties finding skilled labour. These risks are balanced by neutral-to-low risks to health and safety and customer relationships.

### Governance

Alliander has a positive exposure to governance considerations (**G-1** issuer profile score). While relatively concentrated ownership, as is the case for Alliander, reduces board independence and can affect governance negatively, the risk is mitigated by the company's track record of a prudent financial policy, resulting in very modest leverage compared to other European networks.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moody's.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

### Liquidity analysis

We assess Alliander's liquidity as strong. Alliander's principal sources of liquidity include the strong and predictable cash flow generated from its regulated network activities (slightly above €600 million for 2023, according to our projections); its sizeable cash and cash equivalents balance, €205 million as of 31 December 2022; and its committed €900 million revolving credit facility, fully undrawn as of 31 December 2022, maturing in December 2026. These sources will be sufficient to cover the company's liquidity needs over the next 12-18 months. Alliander benefits from a well-spread debt maturity profile, reducing refinancing risk (see Exhibit 11).

Exhibit 11

**Alliander has a well-spread debt maturity profile with the most expensive embedded debt maturing by 2024**

Repayment schedule of interest-bearing debt as of 31 December 2022

Excludes €123 million in lease obligations.

Source: Alliander and Moody's Investors Service

Alliander has exposure to contingent liabilities represented by cross-border leasing (CBL) arrangements, but the associated liquidity risk has significantly reduced after the company terminated two contracts in December 2021. As a result, in the case of an unscheduled early termination of the remaining contract, Alliander's total exposure (maximum strip risk) was only \$32 million as of December 2022. The last CBL arrangement will expire in January 2025.

### Government support considerations

Given its 100% ownership by Dutch provinces and municipalities, Alliander falls within the scope of our [Government-Related Issuers Methodology](#), published in February 2020.

Alliander's Aa3 rating incorporates a two-notch uplift from its standalone credit quality, expressed as a BCA of a2, reflecting a strong probability of extraordinary financial support from its owners, the largest of which is the province of Gelderland with a shareholding of 45%, if needed. Although the ownership of Alliander is relatively fragmented among 74 provinces and municipalities, our assumption of strong support reflects the importance of Alliander's network operations for the regional economy; the fact that the four largest provinces together hold 76% of the company's shares; and the strong governance framework in the Netherlands with oversight by the national government.

Our assessment of very high default dependence reflects Alliander's significant exposure to the Dutch economy, because almost all of the company's revenue and cash flow are generated from domestic activities.

In addition, the Dutch government's ambitious decarbonisation agenda increases the strategic importance of Alliander to its owners because the central government increasingly sees municipalities as partners in the energy transition. In this context, the Dutch government intends to provide sufficient capital for network operators to facilitate the national decarbonisation strategy. This is taken into account by the legal framework agreement between the central government and the Dutch DSO, under which the DSO have the option to apply for an equity injection by the government to strengthen their capital structure.

## Methodology and scorecard

Alliander is rated in accordance with the rating methodologies for [Regulated Electric and Gas Networks](#), published in March 2017, and [Government-Related Issuers](#), published in February 2020.

CREDIT RATINGS ISSUED BY MOODY'S CREDIT RATINGS AFFILIATES ARE THEIR CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MATERIALS, PRODUCTS, SERVICES AND INFORMATION PUBLISHED BY MOODY'S (COLLECTIVELY, "PUBLICATIONS") MAY INCLUDE SUCH CURRENT OPINIONS. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE APPLICABLE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S CREDIT RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the credit rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody.com](http://www.moody.com) under the heading "Investor Relations — Corporate Governance — Charter Documents - Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
